

Erasmus+ KA1 Course

Teaching for the Nature, Teaching for the Future

ErasmusLearn Training Center

www.erasmuslearn.eu

Mellieha, Malta

Organisation ID: E10406068

Summary

Teaching for the Nature, Teaching for the Future is a hands-on Erasmus+ training course designed to support teachers and education staff in integrating Education for Sustainable Development (ESD) into everyday teaching practice. Through collaborative activities, reflective sessions, and real-life learning experiences, participants explore the 17 Sustainable Development Goals, exchange good practices, and develop practical tools to design engaging, eco-conscious projects inside and outside the classroom.

Purpose

The course aims to empower educators to adopt a reflective and action-oriented approach to Education for Sustainable Development, strengthening their capacity to motivate students, implement sustainable practices at school level, and lead meaningful green initiatives. By combining pedagogical input, teamwork, and experiential learning, the programme supports teachers in shaping future-ready, responsible, and sustainability-minded learning environments.

Objectives

During the course, participants will :

- Become familiar with Education for Sustainable Development (ESD) and learn about the 17 Sustainable Development Goals.
- Build a reflexive approach on their own practice inside and outside the classroom to keep students engrossed and motivated throughout their school curriculums.
- Reflect on the best way to effectively implement ESD into their teaching methods.
- Learn how to lead exciting environment-friendly projects and promote “green” activities.
- Share experiences and exchange good practices with teachers and education staff from all over Europe.

Plus:

- Participants will have the opportunity to visit a local organic farm specialized in permaculture pedagogy (depending on dates).
- Participants will visit sites, museums, monuments and enjoy our tailor-made activities.

Course Agenda

Day 1

- Participants' arrival
- Individual orientation and information about the venue and the city
- Individual expectations, setting goals for the week
- Presentation of ESD and its 4 pillars and the 17 Sustainable Development Goals
- Role of teachers in Education for Sustainable Development

Day 2

- Reflection on how to broaden the experience outside my school, involving my students.
- Who are the actors working with schools ?
- The different areas where schools can be located and their possible issues.
- How to start a project and to include ?
- Team activities
- Visit of a permaculture farm (depending on dates)
- Dinner in traditional restaurant.

Day 3

- Reflection on my own practice.
- How do I implement Sustainable Development in my organisation, my classroom, my lesson plans ?
- What tools do I have at my disposal to teach ESD ?
- Team activities
- Guided visit of the city. Cultural activities (visit of the local museums) and enjoy the famous homemade traditional food specialties.

Day 4

- Reflection on my school's needs.
- What do sustainable schools look like and the eco school label.
- How to start a project and who to include ?
- Team activities

Day 5

- Space for discussion of future cooperation and planning follow up activities
- Course roundup and final evaluation
- Validation of learning outcomes and certification ceremony
- Participants departure
