ERASMUS+ KA1 · TEACHER TRAINING COURSE

AI & Digital Tools for Language Teaching: Creative and Interactive Classrooms

5 Days • Heraklion, Crete • OID: E10020547

About the course

AI can save language teachers hours of preparation and make lessons more interactive. This practical course shows teachers of any foreign or second language how to use AI assistants such as ChatGPT and Gemini, together with simple digital tools, to create texts, listening material, games and speaking activities at the right level for their learners.

Through hands-on workshops, participants practise reading, listening, vocabulary, speaking and writing activities with AI, learn when AI feedback can be trusted, and leave with a ready-to-use lesson pack.
